C Minor Arpeggio

Played from its root, the primary implication of this note grouping creates C Minor7th sounds. So if you see a CMin7 chord stated on a chart or purely seek this type of sonority within your music, try these notes. By thinking modally when space and taste allow for creative input, a useful substitution for CMin7th can be EbMaj6th or even the G and Bb rooted chordal inversions listed below. Each has its own "mood".

Sample harmonies (try soprano strings):

CMin	CMin7	Bb(inv.)	CMin7
C,Eb,G,C	to C,G,Bb,Eb	or Bb,Eb,G,C	to C,G,Bb,Eb
R,b3,5,R	R,5,b7,b3	b7,b3,5,R	R,5,b7,b3

A good way to use this arp melodically is to play it in triplet sequences from each root: (R,b3,5-b3,5,b7) etc. against a Minor or Minor7th chord for a modal effect.
